KEEPING SKIN PROTECTED AND HYDRATED

I think we can all agree that frequent washing of the skin is SUPER important, as it helps to wash away any dirt and germs lingering on the skin’s surface.

However, washing can also wash away the protective layer of lipids that stop your skin drying out. Without this protective layer your skin is more exposed to any external aggressors, like dry air and pollutants, making it easier for moisture to leave your skin.

So ...we know we should frequently wash our skin (that’s hands and body) to help stop the spread of germs, but we also want to keep our skin hydrated and protected. What’s the solution? Moisturisation! Moisturising the skin helps to protect that protective barrier (which we spoke about earlier) to keep skin hydrated. What’s more, our Lemon Protecting Hand and Body Lotion provide 72-hours of intense moisturisation to keep that moisture locked in, leaving your skin in tip top condition.
